SPOTTING SCOPE WITH BUILT-IN LRF

**'D1320<sub>M</sub>**

 Android™ compatible

The Spotter LRF PRO is the first of its kind—a combined spotting scope/laser rangefinder system. It makes it faster, easier and more accurate than ever before to acquire range, inclination and azimuth data on long-distance targets.

This model is built to MIL-STD-810G standards and is fully ruggedized to handle real-world military deployment. With 15-45x variable magnification, fully multi-coated optics, an etched mil-dot reticle, Bluetooth/USB output and LED display, the Spotter LRF PRO is among the most versatile optics you can bring with you to the field. This model is compatible with an Android™-based application, Bluetooth capability (BT version) with Kestrel ballistic calculator, and other peripheral devices.
